

Jumbotag[®]

“Tough & Durable Gilt identification”.

Lifetime Jumbotags

A larger version of the Rototag, many have tried to copy the Jumbotag with low-quality materials but don't be fooled, there is no substitute.

Short-term Jumbotags

The same shape and size but made from a lower quality Nylon for short term applications (up to 12 months). Supplied laser printed or hot foil embossed with your choice of details on either side. Inside can also be printed.

Metaltag

Anti Rust - Flame Resistant

Used mainly for cattle but suitable for all official marking applications in place of slap marking. Quick and simple to use, deep embossed with farm code and animal ID if needed.

Actual Size

Metaltag*

Especially produced to provide permanent identification in place of slap marking for official purposes.

Porcine tags for
Management Identification

* will fit most existing applicators using conversion insert.

Supertag[®]

“Thicker & Stronger”!

Made from the highest quality Polyurethane with a unique Impact modified self piercing pin. Once applied the **Supertag** swings freely and can rotate a full 360° out of trouble.

A Flexible “No Snag” Tag with 6 sizes available in Male or Female, each size is fully interchangeable with the other. Male tags are normally applied to the back of the ear.

Simply choose the combination you require. U.V. Stabilised and Microbial resistant.
For actual sizes see page 6.

Suretag®

“Low cost - Easy to read”.

Europe’s Choice for Visual Pig ID

Made from high quality TPU and available in two sizes the Suretag is the most flexible way to identify your herd when visibility is required. Interchangeable sizes, the male tag is normally applied to the back of the ear and the point is protected with a closed cap on the female part. Available plain for self-marking with the Dalton marker pen or dark laser printed as required. When printing official codes on both sides it is also possible to print one side smaller to allow space for self marking.

Suretags fit most needle type applicators by simply replacing the needle with our conversion kit.

What's inside?

Philips® Hi-Tag S Chip on Board. Welded to coil (Large Version pictured)

Thicker, high quality wound & heat formed Coated coil

Where Legislation requires that all livestock are individually numbered identification becomes harder to read, record and trace without the need for a large labour force.

Modern electronic identification provides the answer. An electronic transponder comprising of a chip and coil specifically tuned to 134.2Khz in ISO standard can be encoded with the animal and farm number as printed in visual form on the outside of the eartag. As an animal walks through a portal or gateway reader the number is read and recorded electronically. No need for additional labour and no costly errors saving time and money.
